

AI-Native Operating Systems & Executive Execution Leader

Pittsburgh, Pennsylvania | 412.287.8640 | russelldudek@gmail.com | linkedin.com/in/russelldudek

<https://russelldudek.github.io/ClickUp/>

Chief of Staff to the CEO

Founder speed becomes company speed only when priorities close cleanly.

Operator-technologist who makes complex work visible, connects technical and business teams, and builds operating mechanisms that turn emerging technology into adopted, measurable outcomes. Direct experience includes AI-first operating transformation, agentic workflow design, high-volume launch execution, executive cadence, high-consequence technical operations, and cross-functional accountability.

CEO-office cadence	AI-native redesign	Agent / human authority	Strategic closure
Executive synthesis	Cross-functional escalation	Board-grade narrative	Lean / Gemba systems

Role-Aligned Experience

Vape-Jet | Director of Operations2025-Present

- Leads AI-first operating transformation across production, purchasing, quality, customer success, support, engineering issue flow, ERP/Odoo, Jira, HubSpot, Slack, telemetry, and AI-assisted workflows.
- Connects factory, field, customer, and machine-fleet signals into prioritized work, earlier risk detection, cleaner handoffs, dashboards, standard work, training, and accountability.
- Works directly in a software-enabled robotics and machine-vision environment with approximately 1,000 fielded robots informing support and operating feedback loops.

DudeWorth | Founder / AI and Automation Advisor2017-Present

- Develops AI-readiness and opportunity frameworks across value, feasibility, data readiness, governance, adoption burden, reuse, and time-to-value.
- Designs agentic workflow patterns using structured context, retrieval, agents, human judgment, escalation, decision records, evaluation, and governance rails.
- Advises on AI-enabled operations, logistics technology, warehouse automation, AMRs, ASRS, cobots, transportation systems, network analysis, and workflow design.

Amazon | Operations Management / Site Leader2014-2018

- Led launch and execution for Amazon Prime Pittsburgh in a 24/7 customer-backward environment supporting approximately five million second-day orders annually.
- Built leadership routines, labor planning, throughput visibility, escalation paths, standard work, and operating mechanisms across safety, quality, customer experience, and engagement.
- Served on the Amazon Prime Now launch team with Whole Foods and contributed to logistics innovation through Prime Air research and Amazon Flex geolocation concepts.

How I Would Contribute

CEO-office cadence Decision-ready briefings, leadership rhythms, priority closure, and a path from raw founder intent to shipped work.	AI work architecture Explicit agent-default work, named human authority, escalation thresholds, auditability, and measurable adoption.
---	---

Additional Operating Depth

Compunetics | Director of Operations and Engineering Management2000-2013

- Progressed through R&D; program management, production management, strategic acquisition, operations management, and director-level leadership.
- Led engineering, manufacturing, quality, customer delivery, and complex technical programs in advanced electronics and high-reliability environments.
- Built quality systems, standard work, root-cause practices, performance measures, and process controls; collaborated with DoD, CERN, Intel, and AMD.
- Published industry articles, delivered technical talks, and participated in the HyperTransport Consortium.

Cardinal Building Products | Regional Director2021-2023

- Built the company's first remote regional operation and modernized distributed CRM, commercial, fulfillment, logistics, digital marketing, SEO, and online-buying workflows.

ZeusVu | Chief Pilot, Autonomous Systems and Aerial Data Operations2018-2022

- Led regulated drone operations across medical, energy, logistics, real-estate, and restricted-airspace contexts with a 100% safety record and no FAA incidents.
- Developed TensorFlow-based concepts for automated aerial inventory and computer-vision-enabled field intelligence.

Enviro Social Capital | Chairman of the Board2014-2017

- Co-founded and led a public-private impact initiative; helped shape and evaluate a \$200 million Social Impact Bond feasibility concept for Pittsburgh green-infrastructure improvement.

Leadership Through-Line

- Build cadence, decision rights, and visible work - not another reporting layer.
- Use AI for preparation, context, monitoring, and repeatable execution while preserving named human judgment.
- Translate technical systems into operating choices, evidence, and ownership.
- Move quickly without promoting concepts into unverified production claims.

Education University of Pittsburgh, Bachelor of Science. Academic grounding includes materials science, physical chemistry, and biology-related studies.	Credentials Google AI Essentials; Food Safety Management; IBM Enterprise Design Thinking Practitioner; Six Sigma; OSHA 10.
Technical toolkit Agentic AI, LLM workflows, RAG, human-in-the-loop design, Python, SQL, JavaScript, TensorFlow, Tableau, Odoo, Jira, Confluence, HubSpot, Slack, GIS.	Community leadership IEEE CMPT and EDS Pittsburgh Chapter Chair, 2012-2016; regional technology programming across industry, academia, STEM, electronics, and manufacturing.

Operating Mechanisms I Build

- Decision records separating context, authority, owner, evidence, and next action.
- Leadership reviews built for decisions and unblocks rather than status narration.
- Issue and escalation systems connecting frontline signal to accountable work.
- Standard work, training, scorecards, and learning loops that make change adoptable.
- AI-assisted preparation and monitoring with explicit human checkpoints.
